

CDSVAN

Digital Chairperson's Unit PV10

Article no.: 05.4080

Description

The digital chairman's unit PV10 serves within the CDSVAN conference system as microphone unit and for the transmission of up to 32 languages. Furthermore votings and voting controls (start/stop etc.) and evaluations are possible with up to 5 keys. RFID Cards and/or PIN registration with up to 10 digits ensure personal identification for e.g. name administration and speaker's lists. An additional help button allows to call for assistance.

With the "Mute" key the chairman of the meeting can mute all active microphones independently of the microphone mode for the time the key is pressed.

The black/silver housing consists of impact resistant plastic and has a silver printed control panel. If desired, the housing upper part and the control panel can be supplied in other colours. So it is relatively simply possible to give to the equipment your personal note, or adapt it to your interior. Further inscription variants are possible in other languages.

Features

Complies to international standard IEC60914
