

DIGIMIC CChair32

Chairmans Microphone unit

Article no.: 05.0156

Description

The DIGIMIC CChair32 offers conference chairmen special priority: the override button mutes all delegate units simultaneously.

In addition, the CChair32 has all the functions of the delegate unit, such as a microphone with push-to-talk function. The microphone button and ring light up red when the microphone is switched on. The integrated loudspeakers ensure decentralized sound reinforcement. The loudspeakers are automatically muted when the microphone is switched on.

All commercially available headphones (3.5 mm jack) can be connected to the headphone socket.

CChair32 has a firmly mounted cable (2.50 m) with a lockable plug.

Technical Data

Digital Audio

- High quality digital audio:
- Sample Rate: 48 kHz
- Frequency response: 20 - 20,000 Hz
- Latency: approx.. 1ms

Connectors

- System cable firmly fixed (2.50m,
- DisplayPort* connector, lockable)
- Socket for next unit (DisplayPort*)
- Microphone socket (Minicon)
- Headphone socket (stereo/mono), 3.5 mm

Features

- Illuminated microphone button for indication MIC ON/OFF, REQUEST
- Two integrated loudspeakers for decentralized audio amplification
- Volume control for headphone

Housing

- Housing upper part: aluminium grey
- housing lower part: plastic, black
- W x H x D: (139 x 22 x 142) mm (5.5 x 0.8 x 5.6) inch
- Weight: approx. 360 g

Certifications

- CE (Europe)

System Components

Supported Central Control Units

- DCen32
Article no.: 05.0050
- DCen32 mini
Article no.: 05.0420

Microphones

- TMD/01
Article no.: 01.0701
- TM58/6 bundle
Article no.: 01.0560
- TMD/382
Article no.: 01.0740
- TMD/CL
Article no.: 01.0750
(all microphones available in different lengths)

Other Components

- DExt Extension Power Supply
Article no.: 05.0025

Software

brählerOS to manage DIGIMIC hardware.
Easy configuration of all delegate units from a single point.
