

DIGIMIC lean+ modular

4+1 built in microphone unit with Custom Chassis

Article no.: 05.1224.32 and 05.1224.32.CH

Application example

Description

DIGIMIC lean+ modular is the delegate unit for your conference. Discreetly integrated into the tabletop, it offers the best conditions for your delegates.

The microphone with push-to-talk function creates optimal conditions. The speaker automatically turns off when the microphone is turned on. All commercially available headphones (3.5 mm jack) can be connected to the headphone socket.

In addition, the DIGIMIC lean+ offers modular space for individual requirements - such as USB or network connection.

In addition to the delegate version, the DIGIMIC lean+ modular is also available as a chairman version. The chairman version gives special priority to the chairman of a conference. The chairman can mute all delegate units with the override button.

Technical Data
