

brählerOS CamControl smart Conferencing for *DIGIMIC* Camera Control Software

Article no.: OS.0500

Description

CamControl based on brählerOS is a camera management software for Camera Control inside your conference network. CamControl allows recalling presets from robotic camera systems to visualize activated speakers automatically.

When a microphone goes live, a selected camera will pan/ tilt and focus on the speaker and be switched to the video destination (e.g. a screen in the conference hall) by network commands of the brählerOS.

CamControl works with digital Sony network controlled cameras.
Other VISCA protocol supporting camera systems available upon request.

Features

- Easily integrates a video camera system into the brählerOS.
- Works with SONY HD-SDI cameras and other VISCA protocol compatible cameras.
- Easy combining of microphone position (Seat) and camera preset.
- Allows configuration of unlimited number of cameras
- Presets are stored in the camera,
- HD-SDI video switcher support
