

DIGIMIC DCen32 mini bundle - SPECIAL

brähler
SYSTEMS

Including:

- 1x DCen32 mini
- 1x CChair ONE
- 14x CMic ONE
- 15x TM 58/6 Microphone
- 1x CM9 to RJ45 adapter cable

Description CMic ONE series

The new **CMic ONE** and the chairman unit **CChair ONE** offer you improved technology in a slim design.

The **CMic ONE series** allows cost-effective cabling with RJ45 connectors, which also allows faster installation. A new circuit design reduces power consumption and allows more microphone stations to be connected to a DIGIMIC central unit.

With the new **CMic ONE as well as and with the CChair ONE**, conferences can be conducted optimally. The chairman unit gives you priority - for example the delegate units can be muted. Of course, the **CChair ONE** has all the functions of a delegate unit with an illuminated push-to-talk key.

Both units have integrated loudspeakers for decentralized sound reinforcement, which automatically switch off when the microphone is activated.

Please order separate RJ45 cable according to your required cable length.

Description DCen mini

The **DCen mini** central control unit controls all connected delegate units of the DIGIMIC system, configures them automatically and forwards the digital audio signals.

The **DCen mini** operates independently in three different microphone modes: AUT, FLOAT and VOX.

The **DCen mini** has one outlet to connect up to 25 delegate units. As soon as a unit is connected to the central control unit, it is immediately ready for use without any further adjustment.

In conjunction with the **brählerOS** software, the **DCen mini** and the connected microphones can also be controlled via software.

System components

Software (optional)

With **MicControl2** you control your conference from anywhere inside the conference network.

Our **CameraControl2** software registers requests to speak and controls the cameras for the corresponding conference delegate.

brählerOS conference software for network-based control of all DIGIMIC system components. Fast and easy configuration of all delegate units from a central location.

The **TM58/6 microphone** is included in the scope of delivery.
